A+ Core Service Technician Exam Score Report

CANDIDATE: NICHOLAS BAIR

CANDIDATE ID: 385860343

DATE: January 11, 2001

REGISTRATION NUMBER: FBBDTT0E98

SITE NUMBER: KS12

EXAM: A+ Core Service Technician Exam

PASSING SCORE: 445 **YOUR SCORE:** 582 **PASS/FAIL:** Pass

CONGRATULATIONS!

This adaptive A+ exam has a score scale between 100 and 900. The minimum score required to pass the exam is 445. The pass rate for the adaptive A+ is the same as that of the previous conventional A+ exam.

Each question on the adaptive test has a known difficulty level. The test score is based on the difficulty of questions answered correctly versus the difficulty of questions answered incorrectly. For example, if easy questions were answered correctly and more difficult questions were missed, a lower score would be received. If harder questions were answered correctly and very difficult questions were missed, a higher score would be received. The A+ exam is passed if the candidate's test score is at or above the minimum passing score of 445 and the candidate has completed all questions presented. Answering all the questions correctly would give you a very high score, but not necessarily a 900. The score obtained would depend on the difficulty of the questions presented.

Even though the adaptive version of the test is shorter than the non-adaptive version, the ability required to pass the adaptive test is the same as that required to pass the longer non-adaptive version. Please note that there is no change to the minimum passing requirement for the A+ exam. The only content change was the elimination of the customer service questions on the Core. For more information, see the FAQs about Certification at www.comptia.org.

You may want to review and study the following objectives:

This examination was delivered at an Authorized Prometric Testing Center. For answers to your questions about A+ Certification testing in the US and Canada, call 1-800-776-4276. Elsewhere, please contact your Prometric regional service center.

PASSING SCORE: 465 **YOUR SCORE:** 620 **PASS/FAIL:** Pass

C O N G R A T U L A T I O N S !

This adaptive A+ exam has a score scale between 100 and 900. The minimum score required to pass the exam is 465. The pass rate for the adaptive A+ is the same as that of the previous conventional A+ exam.

Each question on the adaptive test has a known difficulty level. The test score is based on the difficulty of questions answered correctly versus the difficulty of questions answered incorrectly. For example, if easy questions were answered correctly and more difficult questions were missed, a lower score would be received. If harder questions were answered correctly and very difficult questions were missed, a higher score would be received. The A+ exam is passed if the candidate's test score is at or above the minimum passing score of 465 and the candidate has completed all questions presented. Answering all the questions correctly would give you a very high score, but not necessarily a 900. The score obtained would depend on the difficulty of the questions presented.

Even though the adaptive version of the test is shorter than the non-adaptive version, the ability required to pass the adaptive test is the same as that required to pass the longer non-adaptive version. Please note that there is no change to the minimum passing requirement for the A+ exam. The only content change was the elimination of the customer service questions on the Core.
